DETAILED BENEFITS OF OUR ENERGY SAVINGS AGREEMENT (ESA)

- When serviced regularly, your unit(s) will run at peak efficiency, which can lower your heating and cooling costs and prevent untimely breakdowns.
- Under our ESA, our technicians will service your units(s) twice annually, once in the spring prior to the cooling season and again in the fall prior to the heating season.
- The agreement term is one year.
- You will also receive priority placement on our schedule (which can come in handy during extreme temperatures), and a 15% discount on any non-warranty parts that we have to replace.
- Also, as an ESA customer, you never pay an overtime fee if you need our services after hours, holidays or weekends.
- Humidifiers/Clean Air Effects and some other limited equipment can be covered at an additional fee that will have to be evaluated and determined by the Technician or Service Manager.
- The standard rate to perform the same tasks offered in the agreement (considered a precision tune-up) will cost approximately \$250.00 for one service on one unit and does not include the other benefits offered with the ESA. During our Precision Tune-up we also replace your air filters with our high quality pleated filters.
- The Energy Savings Agreement really is the best way to get the most for your money.
